

INDUSTRIAL COATING / PROJECT SELECTION SHEET

ZINTEX FIREGUARD ALK-1016

one-component alkyd fire-protective coating developed for aluminium in bridges and structural steel.

Product family	Fire-protective coatings
Material type	Alkyd fire-protective coating
Binder family	Alkyd
Components	One-component
Suitable substrates	aluminium, carbon steel
Typical project contexts	bridges and structural steel, chemical-processing facilities, industrial floors and warehouses
Supply format	Industrial packaging confirmed for the order

Selection and specification

Specify the exposure, surface-preparation standard, target coating system, colour, application method and destination. ZINTEX will confirm whether FIREGUARD ALK-1016 fits the project or propose a made-to-order alternative.

- | State the service environment, exposure type and expected maintenance interval.
- | Provide substrate condition and the required surface-preparation standard.
- | Specify application equipment, site conditions, colour and finish requirements.
- | Confirm destination, order volume, packaging, labelling and documentation needs.

Application parameters

Surface preparation, mixing ratio, induction time, application viscosity, nozzle selection, dry-film thickness, theoretical spreading rate, drying time, overcoating interval and temperature window are confirmed in the approved project specification and batch documentation. Do not select these values by analogy with another product.

System compatibility

Use ZINTEX FIREGUARD ALK-1016 only within a technically reviewed coating system. Compatibility with primers, intermediate coats, topcoats, thinners and previously applied materials must be confirmed before work begins.

Safety, storage and transport

Professional industrial use only. Obtain the current Safety Data Sheet before handling. Follow local occupational, fire, environmental, packaging and transport requirements. Keep containers closed and store them under the conditions stated in the batch documents. Shelf life is confirmed for the supplied batch.
